

# Get Authorized Training with the Technical Training Leader

NetCom Information Technology is proud to be an Autodesk® Authorized Training Center (Autodesk® ATC). Every course follows the Autodesk Official Curriculum and is taught by an Autodesk Certified Trainer for gaining skills in related products.

## NetCom Technical Training Options

The expert Autodesk team at Netcom is committed to providing the most extensive, high-quality, professional development programs in the industry to help you maximize your training investment.

### Real world courses

Students achieve maximum retention through hands-on learning. In our classes, you will learn an operation through a series of short lectures followed by hands-on practice of the skills presented. We focus on a balanced delivery of lectures and labs that help you learn real world uses of the product, increasing your performance, productivity and marketability.

### Expert-led Training

Netcom technical trainers are highly-skilled professionals who possess a valuable combination of real-world experience and product expertise. We provide our instructors continuous venues for training to keep their skills current and relevant for our clients. Hands-on classes and labs

Small, interactive classes provide the individual attention needed to excel, along with exclusive access to personal workstations, ergonomic chairs and our state of the art facilities. At NetCom, we adhere to stringent Autodesk® designated lab requirements.

### Certified Curriculum

Quality curriculum is a top priority for Netcom. The authorized courseware, included with your class, brings practical industry examples into the classroom to enhance your overall learning experience. Successful candidates are awarded Certificate of Completion directly from Autodesk®. Custom training

If your organization has specific training needs, we can customize a class just for you. We will work with you to address the skills gap and develop a unique training program to optimize your training investment.

### Testing Information

NetCom is an authorized testing center for Sylvan Prometric and VUE. You can take the tests on-site. To register for a test, please call us at 1-888-563-8266.

### Custom Classes

If your organization has specific training needs, we can customize a class just for you. We will work with you to understand exactly what you need to optimize your training investment.

### Autodesk® Courses
